

**...we prefer to  
rest on flakes from  
a HOMBAK wood  
shaving mill**

*Type* **HTZ**

Advantage of movable wood hopper. Hopper is charged one time and flaking process starts automatically.

## Fully-automated process

Advantage of movable planer unit: hopper is stationary and wood can be charged continuously according to the degree of flaking. Design for high-power machines integrated in a fully-automated process chain.

## Technical data

Type of machine <b>HTZ</b>	Dimension unit	Stationary hopper with continuous feeding				Movable hopper with discontinuous feeding		
		2	4	6	8	2	2	4
Number of cutter heads	piece	2	4	6	8	2	2	4
Diameter of cutter heads	mm	250	250	250	250	250	250	250
Shaft length	mm	1.300	1.300	1.300	1.300	650	1.300	1.300
Number of grooves	piece	8	8	8	8	8	8	8
Feeding speed	m/sec	0 - 1,3	0 - 1,3	0 - 1,3	0 - 1,3	0 - 1,3	0 - 1,3	0 - 1,3
Planer depth	mm	0 - 8	0 - 8	0 - 8	0 - 8	0 - 8	0 - 8	0 - 8
Log length	m	2,0	2,0	2,0	2,0	2,0	2,0	2,0
		2,5	2,5	2,5	2,5	2,5	2,5	2,5
		3,0	3,0	3,0	3,0	3,0	3,0	3,0
Drive capacity	kW	1 x 160	2 x 160	2 x 160 2 x 110	4 x 160	1 x 55	1 x 110	2 x 110
Capacity*	t atro/h	3	6	8,5	12	1	2	4

\* Depending on planer depth, feeding speed, flake thickness and shape of flake as well as type of wood
